

Ahmed Moosani

Mumbai | 7738867706 | amooosani123@gmail.com | linkedin | Portfolio | github

Education

Narsee Monjee Institute of Management Studies (NMIMS), MBA Tech Artificial Intelligence 2023 – 2028

- **GPA:** 3.75/4.0 (Current)
- **Coursework:** Machine Learning, Deep Learning, Computer Vision, NLP, Computer Networks

Experience

Sales Intern, AH Enterprises – Mumbai Dec 2024 – May 2025

- Streamlined daily delivery scheduling for **20+ orders**, reducing fulfilment delays by **~30%** through proactive coordination between sales and delivery teams.
- Accelerated invoice turnaround by **~25%** by standardising documentation templates, reducing back-and-forth across **3 departments**.

Smart India Hackathon (SIH) – Mumbai 2024

- Cleared college-level selection round, qualifying for the national innovation challenge focused on real-world problem solving.

RIIDL Hack (Incaverse) – Mumbai 2024

- **Top 10 Finalist** in a 24-hour hackathon; qualified among leading teams for innovative solution design.

Executive, IEEE MPSTME (Logistics Department) – Mumbai 2024 – 2025

- Coordinated event logistics, team operations, and cross-functional collaboration for technical initiatives.

Projects

Real-Time Suspicious Object Detection System linkedin, github

- Trained a **YOLOv11s** model over **60 epochs** on a custom dataset of **30,000+ images**, achieving **99.5% mAP@50**, 91.8% mAP@50-95, and 98.4% precision; supports live camera feeds, video files, and batch image processing with real-time bounding box overlay.
- *Tools:* Python, YOLOv11, Ultralytics, OpenCV

Deepfake Detection Framework (CNN-BiLSTM) linkedin, github

- Built a hybrid **CNN-LSTM** model using **PyTorch** to detect deepfakes in images and videos, achieving **93%+ accuracy** on a **60,000-sample** dataset; deployed as a full-stack web app via Flask REST API with real-time confidence scoring.
- *Tools:* Python, PyTorch, CNN, BiLSTM, OpenCV, Flask

RAG-Based Multi-Agent Travel Chatbot github

- Designed a **3-agent architecture** (flight, hotel, RAG) using **LangChain & AWS Bedrock Titan**, integrating live Amadeus Flight API and Booking.com RapidAPI to generate personalised itineraries with real-time availability data; built on FastAPI with a TypeScript frontend.
- *Tools:* Python, TypeScript, LangChain, AWS Bedrock, FastAPI, RAG

AI Railway Traffic Optimization Platform github

- Developed an ML-powered predictive maintenance system using **RandomForestClassifier (99% accuracy)** and GradientBoostingRegressor on **4,000 data points**; built real-time train monitoring dashboard with WebSocket updates (**<100ms latency**) and Docker deployment.
- *Tools:* Python, scikit-learn, FastAPI, Next.js, TypeScript, Docker

Technologies

Languages: Python, TypeScript, C++, SQL, C# **Frameworks & Tools:** PyTorch, FastAPI, Flask, Docker, OpenCV, scikit-learn, Next.js

AI/ML: RAG pipelines, LangChain, LangGraph, CNN, BiLSTM, YOLOv11/YOLOv8, Embeddings & Vector DBs (FAISS/ChromaDB), AWS Bedrock, TensorFlow
